

# Ngo Tan Hung

Website Developer

## About Me

Hello! I'm **Ngo Tan Hung**. I am passionate about working with computers. I spend hours and hours researching cool stuff on the computer. I love handling user data on a Website or mobile app.

I can easily capitalize on low hanging fruits and quickly maximize timely deliverables for real-time schemas.

# Work Experience

## Frontend Developer

May, 2021

### Blockchain Website Development

As a team of 4 individuals, we embarked on a challenging yet exciting journey to develop the interface for a cutting-edge blockchain website. Our team was well-balanced, consisting of 2 frontend developers and 2 backend developers, each contributing their expertise to create a seamless and secure user experience.

Over the course of 5 months, our collaborative efforts focused on translating innovative ideas into tangible features. The frontend team worked diligently to design and implement the user interface, ensuring an intuitive and visually appealing experience. Simultaneously, the backend team handled the complex architecture and functionality required for blockchain integration, emphasizing security and efficiency.

Our commitment to excellence and efficient teamwork allowed us to navigate the challenges of blockchain development

successfully. The result is a sophisticated website interface that reflects the synergy of our frontend and backend efforts, providing users with a robust and reliable platform.

If you're interested in exploring the codebase, you can find our project on [GitHub](#).

October, 2021 - Present

## Personal Project Experience

During my academic journey and free time, I've undertaken several personal projects that reflect my passion for continuous learning and exploration in the field of technology.

Our collaborative efforts focused on translating innovative ideas into tangible features. The frontend team worked diligently to design and implement the user interface, ensuring an intuitive and visually appealing experience.

### Backend Developer

November, 2023 - Present

Participate in developing the Backend Rookie Hackathon 2023 project at ATCOLLABO ACADEMY. Our team, consisting of 6 individuals, embarked on a 10-day journey to turn our innovative ideas into reality. The project is mainly for educational purposes. But this was a competition so we put in a lot of effort and brought the team the second prize in the competition. .Because the time is not too long, the development process is still limited, but Team has strived to create solutions suitable to the challenges presented in the hackathon.
